Business Analyst – Internship

Restaurant Magic Software is looking for a limited number of interns to fill Business Analyst positions. These internship positions will provide excellent insight into our overall business operations, the restaurant industry, and the mechanics of a software company. Each intern will be exposed to a variety of roles throughout the internship including, but not limited to: software configuration, data manipulation, customer support, general problem solving, and software assurance.

The skills and qualifications for the internship positions include:

- Currently enrolled in the USF College of Business, prefer sophomore level and above
- GPA of at least 3.0
- Excellent computer skills
- Ability to quickly learn new software
- Proficient with Microsoft Office applications
- Excellent communication skills (written and verbal)
- Database skills a plus
- Experience working in a restaurant a plus

Our internship positions are for six months and each intern will receive a letter of recommendation and/or documentation needed for school credit. Interns typically earn an honoraria for excellent performance during training, and an hourly wage thereafter. Exceptional performance may lead to a permanent placement opportunity.

If interested, please send resume to:
